

# Layout Guidelines for Edition MatchingArts

## Pages:

- A4 (210x297mm): parts and smaller scores
- A3 (297x420mm): larger scores
  
- Margins: at least **12.7mm** on all sides.
- The footer has to be free of all text. There has to be room for us to include information, such as copyright details and serial numbers.
- The header has to be free of all text, except for the title and composer of the piece on the first page, and page numbers in the outer corner of the page.

## General:

- The first page of music will be marked as page 1.
- Every system has the bar number at the start.
- Make sure the music can be read with ease. Accents, slurs, ties, text and dynamics shouldn't collide and there should be enough space between the staves, systems and notes.
- Place page turns strategically.
